The Biology of Decay in Trees Course

Hatfield Forest

4th and 5th October 2016

A comprehensive two day course to improve the awareness of the aging process of trees with particular emphasis of decay processes. An introduction to the wealth of dependant organisms and the implications for nature conservation and management is part of the course content.

Course Speakers:

Dr. David Lonsdale (tree consultant, author and lecturer)

Dr. Keith Alexander (Ecological Consultant and Invertebrate Specialist)

Jill Butler (Woodland Trust ancient tree specialist)

Course fee - £250 excl. VAT
